About me

I've been passionate about programming and technology since I was a child. I've always enjoyed playing games, and I was curious about how games and programs worked. That's why I decided to get into the field, starting at PUCRS.

I studied for 2 years at PUCRS, where I learned logic, Java, SQL, Latex, and carried out several projects with up to 10 people. I am currently studying at Senac-RS, where I studied logic and SQL again, and I am studying Python and English.

I am eager to start my professional career. I am hard-working, I like to research, study and learn new things. I work well in groups and alone. I am calm, patient and focused.

Professional Objective

My goal is: professional growth and development. I want to put into practice what I have learned, and learn new technologies and programming languages. I am looking forward to working on new projects and expanding my knowledge.

Education

- Systems Development Technician - Technical Course, Senac-RS

09/2024 – In progress | Porto Alegre, Brazil

Status: In progress

Skills: Python, SQL, English, Git/Github

- Bachelor's Degree in Software Engineering - Higher Education, Pontifical Catholic University of Rio Grande do Sul

02/2022 – 07/2024 | Porto Alegre, Brazil

Status: dropped out

Skills: Java, SQL, LaTeX, Git/Github

- High School, Vicentino Santa Cecilia School

02/2019 – 12/2021 | Porto Alegre, Brazil

Skills: PowerPoint, Word, Sony Vegas Pro

Job Experience

- **Freelance**

06/2021 – Present

I have created some websites for companies and individuals. In total I have made 8 websites, you can find them on my github

Skills: JavaScript, HTML, CSS

04/2025 – Present

I started working for a real estate company called J&J, doing real estate agency work. More specifically: adding properties to the company's system.

Languages

Brazilian Portuguese - English

Soft Skills

Patience – Eager to learn – Like to teach - Likes to work in groups – Calm – Hard worker - Focused

Technical Skills

Java – Python – SQL – Git/Github – HTML – CSS

Projects

- Chronos

04/2022 – 06/2022

This program calculates how long a person has lived, and how long it will be until their next birthday. This project taught me how to manipulate dates in Java and JavaScript.

Technologies: Java, JavaScript, HTML, CSS

https://github.com/lucashartmann/Chronos-Front

Site: https://chronos-front-plum.vercel.app/

- Zombie Hunter

10/2024 – present

A game where the player controls a hunter who moves around the map, hunting and fighting zombies using dice mechanics.

Technologies: JavaFX

Link: https://github.com/lucashartmann/zombie-hunter

- CarDeal System

03/2024 – present

A system for a car dealership made in Java. The system allows control of the vehicle catalog, customers and sales

Technologies: Java, Swing

Link: https://github.com/lucashartmann/CarDeal-System

- Costa's Adventure

06/2022 – present

2D platform game made in Unity. I implemented movement, combat and enemy intelligence mechanics.

Technologies: C#, Unity

Link: https://github.com/lucashartmann/Costa-Adventure

Courses and certificates

- English for IT 1 - Cisco
- Create a website using HTML, CSS and JavaScript - Bradesco Foundation
- Introduction to Object Oriented Programming (OOP) - Bradesco Foundation
- Basic Programming with Java I - Federal Institute of Education, Science and Technology of Rio Grande do Sul
- Responsive Web Design - freeCodeCamp
- HTML - part 1: Introduction to web page development - Federal Institute of Education, Science and Technology of Rio Grande do Sul
